

Barbecue season is always!

Barbecues with friends make us happy and - very important- are very simple. Everyone brings what they like: vegetables, skewers, mushrooms, meat, fish or fruits... This process will be extremely simple if an electric grill is used. It is always quick at our disposal, it heats quickly, it is safe and does not produce a lot of smoke, this pleases the neighbours too. In the balcony, the terrace or outdoors, the electric grills will convince due to their comfort factor at any time of the year.

Cloer, the manufacturer of small electric appliances from Arnsberg, offers the new barbecue grill 6789 for an easy use.

Thank its big die-cast aluminium grill plate the heat will be optimal distributed until the borders. The heating element is directly integrated in the grill surface. Therefore, the fat does not drop over the heating element and this reduces the production of noxious substances. A very practical detail in the barbecue 6789 is the thermometer in the removable lid. This way, it is possible and easy to control the temperature when the lid is closed. The desired cooking time for fish and meat will be perfectly controlled.

With its 2000-2400 watts, the barbecue 6789 achieves quickly a very good heating capacity for an optimal result. The adjustable temperature controller allows furthermore, an appropriate heat supply/decrease. Nothing will be burned, and every individual desire could be fulfilled even by an inexperienced barbecue expert. Everybody can help here!

The barbecue 6789 has a non-stick surface; therefore, the use of fats or oils is not necessary. Another practical detail of this barbecue is the oval grill surface which is divided in two halves, one has a groove structure for appetising roasting strips, the other one is completely flat for sensitive foods like fish fillets or even some fried potatoes. The grill 6789 has under the barbecue a basket to secure the supplies.

After grilling, it should still be easy to clean up: the whole electronic control is integrated in the connection cable, which can be removed completely. This way, the grill surface and the grease drip tray are easier and safe to clean. The foot could be removed in order to store the unit in a space-saving form – until the next time, that is probably soon!

The barbecue grill 6789 is available in specialist shops, department stores and online shops. The recommended retail price is 199,99 €.
