

XXL... XX-Good

XXL Toasts are usually a bit more and bigger than the usual ones. That could be a space problem for the European toasters. Therefore, Cloer has designed -for all the king-size toast lovers- a new toaster to enjoy the perfect toast in American style: the toaster 3531.

Thanks to the shining white plastic housing together with black elements, the toaster 3531 fits perfectly in every kitchen. Obviously, Cloer the breakfast expert from Germany has thought of everything.

The 3531 presents an extensive equipment programme. A very special highlight is the Toast-Check function. With this function, the degree of toasting can be checked and, if desired, the process interrupted thanks to the stop key. The product offers two more useful functions: reheat and defrost function. Both are a must to enjoy a fresh, crunchy bread. Moreover, the safety switch-off provides a very trustworthy help in case the toast gets stuck.

The 3531 ensures optimal toasting thanks to the sensor electronics and selfcentring of slices. The infinitely variable browning control enables a very simple and intuitive use for perfect toasting re-sults in big format. The crumb tray -which makes cleaning easy- and the included bun warmer are also for this toaster a very typical Cloer quality label.

With the measurements 22 cm (H), 15,5 cm (W) and 28 (L) the toaster 3135 is designed for two slices of king-size toast up to a maximum of 12 x 12 cm. The 750-900 watt ensure a very quick bread's browning in every situation.

The toaster 3531 is available in specialist shops, department stores and online shops. The recommended retail price is 47,99 €.
