

Egg, Egg, Egg Boiler

Egg boilers are energy savers: they need 1/5 less energy than cooking an egg on the stove and they waste 1/10 less of water (depending on the pot). Moreover, the eggs will not be cooked in water, but in water steam. This way, the valuable ingredients are safely maintained. And the best: egg boiler make everything simple.

The typical Sunday question if the egg will be well cooked, will not exist anymore with this product. The new egg cooker 6070 of Cloer cooks quickly and efficiently seven eggs. This product will be indispensable for Sunday's abundant breakfast, for a nutritious supplement to a fresh salad or just for a healthy snack.

The harmonious round design and the quality materials (stainless steel housing and black plastic elements) provide a very attractive appearance.

The 6070 has a very efficient equipment: The stainless-steel cookware and the removable egg tray are very easy to clean, they just need to be wiped down with a damp cloth. Even the transparent lid is way more than that: its serving function is an additional help for the egg lovers.

The rest of the equipment is typical Cloer, which means high quality: A knob for adjusting degree of hardness, continue cooking function, measuring cap with egg picker, easier is not possible! The cable rewind is very practical to storage the unit in the kitchen cupboard or over the worktop.

In addition, the egg cooker 6070 can be used to poach three eggs at the same time. If the poaching of eggs in the kitchen is a challenge, the egg cooker 6070 will make it a child's play. In the provided poaching trays the result will be so delicious and nutritious as with boiled eggs.

The egg boiler 6070 is available in specialist shops, department stores and online shops. The recommended retail price is 44,99 €.
